

Radicalism in the Mountain West
Socialist, Populist, Miner, and Wobbler
By David Brodsga

"The clear, straightforward style along with the liberal use of direct quotes from historical figures make this a very readable and engaging book. . . . *(Radicalism in the Mountain West)* fills a significant gap in the historical literature."
—David Brodsga, University of California, Santa Cruz

The Mechanics of Optimism
Mining Companies, Technology, and the Hot Spring Gold Rush, Montana Territory, 1864–1868
By Jeffrey J. Safford

"A detailed case study of eastern investors who blindly invested in 'wobblers' western mines. This book is extensively researched—using manuscript collections in eight states and the District of Columbia—and clearly written. It is a concise and a useful contribution to the history of western mining."

Drifting West
The Colonies of James White and Charles Baker
By Virginia Simons

"Where does history leave off and folklore begin? Simons implicitly provides one answer to this question as she relates the story of James White, who emerged from the Colorado River at Calville, NV, in 1867 as the sole survivor of a prospecting expedition led by Charles Baker into the San Juan Mountains of Colorado. . . . Recommended for collections on Colorado history [and] the West."

Hard as the Rock Itself
Place and Identity in the American Mining Towns
By David Robertson

Mining the American West Series
"Much of the literature about mining emphasizes its negative aspects such as pollution and landscape degradation. This book, however, is different. . . . one should be impressed by how tenacious the former mining population can be—and how deeply the mining experience can affect attachments to the land, even though outsiders may consider that land 'voiced.' Written with restraint and reasonable objectivity, *Hard as the Rock Itself* is highly recommended to anyone interested in mining history."
