

**Index to Articles Published in the First Thirty Issues  
of the *Mining History Journal*, 1994–2023**

The following is an index—by author, by subject, by title—of every article appearing in the first thirty issues of the *Mining History Journal*. Each citation contains the article’s author, title, volume, year, and page numbers. Subject categories, of course, can be subjective. Being an index for a mining history serial, subject categories emphasize substances mined and the states and provinces where that mining occurred. Items are cross indexed by subject in the instances that it seems useful to do so. Within subject categories, articles appear alphabetically by title. The entire index may also be word searched using the computer’s “Control F” function.

**By Author:**
